Hauppauge High School "FIRST" Robotics Team Presentation

Dear Rotary Club member,

Welcome and thank you for inviting us to speak to you this morning!

We appreciate this opportunity to tell you about our participation in the "FIRST" robotics competition and our plans for the 2001 events.

"FIRST" is an acronym for "For Inspiration and Recognition of Science and Technology". It's a national contest, sponsored by NASA and the US First organization, which is designed to introduce high school students to the exciting world of engineering by offering them an opportunity to build a robot and compete against other participating schools.

Our hope in making this presentation is to build awareness and inspire community involvement and support in order to achieve the aggressive goals we have set for ourselves for next year's competition, which starts in January, 2001.

Our agenda will be short and to the point. If possible we will also give you a demonstration of the robot which we built for last year's competition.

At the end of the presentation we'll answer any questions you may have. We'd like to ask those of you who feel you can help to talk to us after the presentation.

As recognition of your support, your company will receive honorable mention on our website and in our Titan's newsletter. Plus you'll have the satisfaction of being a part of our team!

And, of course, you're invited to attend the competition, which will take place at the new Sports/Convention Center at Suffolk County Community College, on Wicks Road, March 9 and 10, 2001.

Thank you again for your support!

Sincerely,

The Hauppauge High School Robotics Team
